

ENROSADIRATIME EFFETTO WOW

The wonderful Fuciade basin, together with a genuine snack, make unforgettable this sunset in the Dolomites

San Pellegrino Pass | Restaurant Albergo Miralago

Thursday, 15th February – 3.45 p.m.

Abstract

One of the sunsets to be immortalised, experienced, and savoured, at least once in a lifetime: the Fuciade basin, with its snow-covered pastures and characteristic wooden huts, is at its best at sunset. Everything is enriched with a sweet and salty Trentino snack to be enjoyed on the return, as the light turns blue and leaves room for the stars.

Description

The Fuciade basin is always beautiful, but it is at its best at sunset: the natural amphitheatre is tinged pink and the view sweeps over the most famous peaks, from Cima Uomo behind to the Pale di San Martino in the distance.

This location is reached by a beautiful walk, immersed in snowy woods and pastures scattered with wooden huts, guardians of the prized hay, the result of mowing the summer meadows. In the company of our friendly guide, you will discover the valley's most hidden secrets and follow the tracks of the animals that inhabit this enchanted place, in a play of natural light that would be the envy of the best special effects in cinema.

On the way back, a proper snack awaits you, also in a gluten-free version, to be enjoyed at the Miralago Hotel, guardian of the suggestive lake "delle Pozze": local cheeses and cold cuts of Fassa Valley, delicious desserts prepared by chef Pietro, and mamma Carmen's legendary apple fritters, together with a warm mulled wine and a "La Trentina" apple juice, will satiate your appetite and warm your heart.
